PEDRALI

THE ITALIAN ESSENCE

YPSILON 4790T

DESIGN:
JORGE PENSI DESIGN STUDIO

Ypsilon table base is conceived to "orbit" on beaches, terraces and gardens, that is to resist to summertime high temperatures, and made of an aluminium structure that will keep it always cold. An aluminium extruded tube that extends itself towards the legs of its casted base, in the same material, giving to the whole shape coherence. Ypsilon leans itself on the floor softly, with transparent plastic feet, just like as it would be floating in the space that contains it. An optional peculiarity: the raisable top, that makes it stackable, thanks to an articulated joint. Suitable for laminate, compact or stainless steel top, folding top.

Same clean outlines, same light and "airy" shape of the original one for the new version of Ypsilon base with 4 spokes.
Suitable for tops of big dimensions either square and round. Cast aluminium base and extruded aluminium column with refined shape are still ypsilons' keys to success. Lightweight, handy and resistant to the weather events, suitable for indoor and outdoor locations
